

I am a licensed amateur extra class radio operator. My call sign is AB9CZ. I stongly oppose Broadband Over Power Line (BPL). I have learned of readings taken near power lines where BPL is functioning on a pilot basis. The signal strengths clearly interfere with communication over the amateur radio bands. The inherent nature of allowing transmission along long lines at those frequencies will result in radio frequency interference and no know technology can prevent it. BPL is not needed as many other avenues are available for high speed access. I urge you not to allow BPL. Steve Rothblatt AB9CZ
